Cyber security

Mission

Active participation in building the cyber security of the Republic of Poland. Thanks to our experience, developed competences and cooperation with the private and public sectors, we contribute to the development of digital economy in a safe way.

Vision

We are a competence center that:

- operates on a 24/7 basis and supports entrepreneurs and citizens in tackling ICT threats
- develop good practices and strategic analyses in the field of cybersecurity and the digital economy
- provides a platform for cooperation and exchange of information between the private and public sectors
- is an important centre in the domestic and foreign arena in the field of cyber security
- is an important research and development centre in the field of cyber security
