## NASK honoured with the Top Industry Diamonds award

NASK was awarded the title of "Industrial Partner of the Year" in this year's edition of the Top Industry Diamonds awards. These are awards accompanying a cyclical conference devoted to the latest solutions in the industry - Top Industry Summit.

Juliusz Brzostek, Director of the NASK Cyber Security Centre Department, accepted the award on behalf of the institute.

"Top Industry Diamonds" are aimed at honoring those companies and entrepreneurs who stand out on the Polish industrial scene in a special way. The idea of Diamonds is to promote the latest and innovative technologies by awarding business representatives implementing new trends in the fourth industrial revolution. The awards are granted in 10 categories, including "Investment of the Year" or "Global Brand of the Year". NASK was awarded in the "Industrial Partner of the Year" category.

The awards accompany the annual Top Industry Summit, which has been held since 2012 and has gained the status of one of the most prestigious industry summits in the region, where representatives of the business and science world discuss the future of the sector.

The conference is organized by the Executive Club, which is a business organization bringing together representatives of top management, representing the most important Polish and international companies. Starting from 2005, the Club brings together business leaders with an established position, who, through their actions, set the directions for the development of the Polish economy.
