## Annual report - .pl Domain Name Market 2018

The .pl domain registry presents the annual report ".pl Domain Name Market" which contains detailed information summarizing the year 2018.

At the end of 2018, the total number of .pl domain names reached nearly 2.6 million, an increase of over 20 thousand as compared to the previous year. This increase was achieved due to a larger number of registrations as well as increased domain names renewal rate, which amounted to over 65.5%, being the highest in 10 years. Last year almost 2.5 thousand domain names were being registered daily average.

The number of .pl domain names, secured with DNSSEC, amounted to 502 083 which is more than a twelve-fold increase as compared to the number recorded at the end of 2017, when there were 40 679 DNSSEC-secured domain names in the Polish registry. Among European domain names, secured with that method, the .pl domain currently holds the fourth place.
